

September

- Worked on the roll out of the **assessment support hub** and how to get students aware and engaged with the hub.
- **Strategy 2030:** Attended every meeting on each strand in this strategy to really bring a strong student voice in every strand. Took up my position alongside the postgraduate officer and Deputy Dean of EPS as Student Voice Stream project lead. Helped voice that more students need to be involved in the strategy at the project creation level and this will be worked on going forward.
- Went out to schools and delivered the **induction presentation**.
- Met with all the **Student Rep Coordinators** together for the first time to share best practices and go over the role and code of practice.
- **Delivered training for UG School and Faculty reps.** Put together a new more information heavy training and invited the Pro Vice Chancellor of Education, Judy Williams, and Helen Mc Neely to speak about the importance of the rep system and student voice, along with academic board. All reps were able to attend bar three which was followed up by additional training.
- **Freshers:** Helped organise and attended all freshers' events. This included giant games with the officers in the lobby for the first two days students joined, helping with selling RAG t-shirts and the running of the RAG pub crawl, the SU mixer event and the create and chat. All these were extremely well attended, and food was provided to students.
- I worked alongside the operations team to organise the **Big Breakfast event** where 750 students attended, and all received a free breakfast.
- Attended all three days of **freshers fair** and pushed council and rep recruitment each day.
- Met with Judy Williams the new **PVC of Education and Students** and outlined my priorities and key issues such as lecture capture, assessment and feedback and student voice.
